

## MOBILE HIGH VOLUME EXTINGUISHERS

It is difficult to replace inflexible, expensive stationary extinguishing systems in vast buildings like manufacturing facilities, airports or hotels. Portable devices do not have the necessary capacity. Our powerful 50-Liters units have five times the volume of their smaller relatives, but the same versatility and safety. With an even better performance, they can cover spacious areas and reach highest storage racks. Real large-scale fire protection in unbeatable economic and reliable ways!

**FARTHER,  
HIGHER,  
LONGER:**

**more than 18  
meters jet range !**

Whether for high storage areas or in large ramified spaces, the units are fast and flexible to apply: With 10 meters of hose, a large radius of action is ensured. They are movable even over stairs and rough ways. The front wheels are lockable for safe use on gradients and the push handle is foldable to save storeroom.

APPROVED  
FOR

- large capacity for medium size fires
- extra high jet range, long duration
- non tilting chassis with big wheels
- moveable over rough ways and stairs
- with wheel brakes; safe on gradients
- quick height adjustment of the handle
- 10 m hose for large action radius

approval	SQ 45/15	SQ 46/15	in preparation

### optional accessories:

#### Swivel gun:

With capacity-saving, extensively spray mode for fighting small fires or preventing re-ignition, smoldering and smoke development.

#### Available on request:

- dust covers
- hose reels
- longer hoses (up to 25 meters)
- CFK pressure bottle for weight reduction
- statutory inspection after 1-5-10 years
- stationary versions without chassis
