SPECIAL EXTINGUISHERS FROM 1.5 TO 6 LITERS

For offensive or defensive use...

These highly effective devices fulfill the challenging requirements of police and security forces. Depending on filling, they are usable for fire fighting or self-protection. Carried by leg holster or backpack, the agility of wearers is not affected. The spray gun is wearable at the lap belt in an optional holster.

Sophisticated and powerful...

The units achieve jet ranges from 9 to 12 meters. Stepless actuation allows variable flow rate for extended jet duration. Filling status and operating pressure can be checked at the integrated pressure gauge. Leg holsters, backpacks and lap belts come with adjustable straps and quick release fasteners.

Efficient and versatile...

Greatest emphasis was placed into weight reduction, simple handling and ease of maintenance. The units can be refilled by the user without tools in very short time; even on location or during action if needed. This also allows filling with pure water for practically cost-free and unlimited user trainings.
