

HiCAFS, HiPRESS & SPRAY FUNCTION

The leading 10-Liter system with **63A IIB*** performance

APPROVED FOR

ONE + ONE = **THREE !**

The calculation is true indeed. In addition to the functions and advantages of HiCAFS and HiPRESS devices, their combination to the VARIO variant also offers a variable spray mode. By setting the innovative swivel gun to compact jet or spray function, the user can fight fire from distance with pinpoint accuracy or cover a large area with a cloud of foam. The jet is optimally adjustable to any fire situation within seconds. Efficiency, flexibility and above all - the rescue capabilities are on highest level.

- adaptable to any form of fire
- most versatile with swivel gun
- allows new firefighting strategies
- maximum safety and performance
- can also be used for decontamination

**exceptional
fire rating !!**

63A IIB*

* conformation of fire extinguishing performance outside of normative conditions (EN 1866-1, EN 3-7)

TECHNICAL DATA

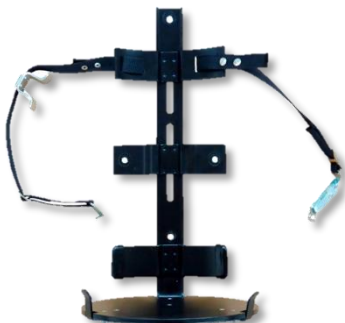

SPECS	VARIO 10
fire rating *	63 A / II B
filling volume	10 Liters
propellant, compressed air	2 liters / 300 bar
operation pressure	34 bar, constant
app. duration, fully triggered	jet 22 s / spray 63 s
jet range (jet/spray)	up to 16 m / app.6 m
range of temperature	-25* to 60° C <small>*with frost proof foam agent</small>
weight (empty/filled)	app. 14.7 / 24.7 kg
distance to electric voltage	min. 1 m, max. 1000 Volt
height	630 mm
diameter of vessel	200 mm
approval	SQ 16/15

* conformation of fire extinguishing performance outside of normative conditions (EN 1866-1, EN 3-7)

optional accessories:

Wall bracket
For mounting in buildings and vehicles.

Additional bottle holder
For second pressure bottle (respiratory protective equipment)

Backpack
with adjustable straps and quick-release fasteners. Assembly kit included
Weight: 1.4 kg

CFRP air bottle
2 liter/300 bar carbon fiber. Replacement for steel bottle(s).
Weight reduction: 2 kg!
